

BIOSTREAM PWP

PARTS WASHING POWDER

DESCRIPTION

BioStream PWL (Parts Washing Powder) is a non-hazardous metal cleaning powder which can be used in most water-based wash systems. It is designed to be low foam and has a built-in rust inhibitor to prevent flash rusting of cleaned metal parts. It is formulated to be non-flammable.

BENEFITS

- Cleans metal part and prevents rust
- Non-flammable
- Non-hazardous, low foam formula

APPLICATION

Add 8 ounces of **BioStream PWL** per 1 gallon of water to cleaning tank. Water needs to be between 100° and 135° F. Place parts in washer. Turn on heater and sprayers. Wash parts until clean and dry with a clean towel.

PACKAGING STORAGE + SHELF LIFE

Recommend storing in sealed containers at <80° F for no longer than 24 months.

GREEN DOWNSTREAM®

When it comes to **Earth-Healing Technology and Products, Green Downstream® gets the Green Light.**

Green Downstream® is an industry leader in biologically responsible technologies, providing safe turnkey applications of proven technology and customized products designed to solve any customer's most complex issue.

Now more than ever, Green Downstream® products, services, and support are unsurpassed at meeting the challenges and growing demands our evolving world faces daily.
