

BIOSTREAM LCP

LEATHER CLEANER + PROTECTANT

DESCRIPTION

BioStream LCP (Leather Cleaner and Protectant) is a water-based silicone emulsion. It is designed to clean and protect leather parts from dry-rot and UV degradation. It is formulated to be non-flammable. It is great for leather seats and accessories and leaves a protective coating against UV, acid and oxidative damage.

BENEFITS

- Cleans and protects leather surfaces
- Non-flammable
- Protects leather from harmful UV rays, acids and oxidation

APPLICATION

Dilute accordingly:

- Heavy Duty: 12:1 (12 ounces of cleaner to 1 gallon of water)
- Medium Duty: 8:1 ratio
- Light Duty 6:1 ratio

Spray area with water and thoroughly saturate before applying cleaner. Wipe clean with a cloth, towel or dry mop.

PACKAGING STORAGE + SHELF LIFE

Recommend storing in sealed containers at <80° F for no longer than 24 months.

GREEN DOWNSTREAM®

When it comes to Earth-Healing Technology and Products, Green Downstream® gets the Green Light.

Green Downstream® is an industry leader in biologically responsible technologies, providing safe turnkey applications of proven technology and customized products designed to solve any customer's most complex issue.

Now more than ever, Green Downstream® products, services, and support are unsurpassed at meeting the challenges and growing demands our evolving world faces daily.
